Johanna -

My questions have been mirroring these pretty closely.

The bulk of my time really has been focusing on #'s 4 and 5 -- but also asking them to really think/and tell me about alternatives (#6)

I've also asked -

1. Who are the community that I may be unaware of (they say Tribes, etc).
2. What else do you need to know about SF (then they talk about education re: SF; SF funding; stigma; and property values, etc.)

Hope this helps.

Thanks

Monica - Let me know if these capture the questions you are have been asking the elected officials and local government representatives -- please feel free to edit/add:

#### Community Interview Questions –

1. What are your concerns about the abandoned mines in the Upper Animas watershed?
2. What do you think your community would like to see happen to address contamination issues?
3. How do you think the broader community should be engaged?
4. What, if any, are your concerns, about a superfund designation in the upper animas?

5. Are you aware of opposition to NPL designation? If so what are the concerns being expressed to you?

6. What else would you like to say about the GKM spill or thoughts on long-term clean up?
